

Please complete the attached questionnaire and pediatric intake forms for me, and bring them with your child's initial evaluation. Also, please bring with you some foods that your child is currently eating, and some foods that he/she refuses to eat or has some difficulty eating. For example, smooth purees, lumpy – stage 3 purees, crunchy foods like crackers, any table foods, etc. Also, please bring any cups and utensils that he/she is currently using.

Please remember to be early to your evaluation, at **least** 15 minutes early, to complete hospital paperwork!
